

Serial No. 09/854,708  
Amdt. dated March 3, 2004  
Reply to Office Action of June 3, 2004

Attorney Docket No. PF01898NA

**Amendments to the Claims:**

---

- CI  
cont.
1. (Currently Amended) A system for facilitating enhanced personal navigation comprising:  
a positioning support device located adjacent to ~~for placement near~~ a navigational feature,  
the positioning support device transmitting navigational information; and  
a user device for receiving navigational information from the positioning support device.
  2. (Original) The system of Claim 1, wherein the user device is operable to communicate  
the navigational information to a visually impaired user.
  3. (Original) The system of Claim 2, wherein the user device provides the navigational  
information in a content accessible format.
  4. (Original) The system of Claim 1, wherein multiple positioning support devices coupled  
by communication links are placed in multiple locations.
  5. (Original) The system of Claim 1, wherein the positioning support device is operable to  
adapt the navigational information communicated based on changes in environmental conditions.
  6. (Original) The system of Claim 1, wherein the user device is capability addressable.
  7. (Original) The system of Claim 1, wherein the positioning support device is operable to  
communicate absolute or relative positions of multiple navigational features.

13. (Currently Amended) A personal navigation unit comprising:  
a receiver operable to receive navigational information from a positioning support device  
located adjacent to ~~near~~ a navigational feature; and  
an output device coupled to the receiver operable to communicate navigational  
information.
14. (Original) The unit of Claim 13, wherein the unit is operable to communicate  
information to a visually impaired user.
15. (Original) The unit of Claim 13, wherein the output device provides content accessible  
notification.
16. (Original) The unit of Claim 13, wherein the navigational information is received from a  
positioning support device.
17. (Canceled)
18. (Original) The unit of Claim 16, wherein multiple positioning support devices are  
coupled by a communications link.
19. (Original) The unit of Claim 18, wherein the multiple positioning support devices are  
operable to receive positioning support information from a remote positioning system.

23. (Currently Amended) A method for communicating navigational information to a user comprising:

receiving navigation information at a user device from a positioning support device located adjacent to ~~near~~ a navigational feature; and  
communicating the navigational information to the user.

24. (Original) The method of Claim 23, wherein the step of communicating comprises communicating with a visually impaired user.

25. (Original) The method of Claim 23, wherein the step of communicating comprises communicating a content accessible notification.

26. (Canceled)

27. (Original) The method of Claim 23, further comprising receiving information from multiple positioning support devices coupled together by a communications link.

28. (Original) The method of Claim 23, further comprising receiving information from a remote positioning system at the positioning support device and communicating the information to the user device.

29. (Original) The method of Claim 27, further comprising a remote server communicating with the positioning support devices and operable to update the information communicated to the positioning support devices and to receive information from the positioning support devices.
